ABOUT ME

I am a Software and Web Developer and fresh graduate of Telematics with passion for programming and design. I have over 1 year professional experience as a Software Developer developing mainly for desktop, but have also worked on several web-based projects. Lately I am focusing on Front-end web development and learning about the latest frameworks like Vue and React. When I am not programming, I like to do some design work and sports.

EXPERIENCE

ALARM AUTOMATIKA

NOV 2016 - PRESENT

SOFTWARE DEVELOPER

Working as Software Developer in Research & Development department at Alarm automatika d.o.o. Worked on several different projects and the ones I worked most on are a self-ticketing cashier for parking lots and a web application for event management (ticketing system) and supervision. For development I mainly used C#, JavaScript/jQuery, HTML, CSS and Microsoft SQL Server.

IMPULS ING

NOV 2015 - JUL 2016

SOFTWARE DEVELOPER

Worked as Software Developer at Impuls ing d.o.o. Responsible for the development of a module for an existing desktop application. Worked with C# and Microsoft SQL Server (Transact-SQL).
